WORK EXPERIENCE

Product Engineer SDE-2

Credivatch**02/2022 – Present**

- Responsible for building a Web Application using **React** which is used to digitise the existing Credit Monitoring Workflow in banks to capture Credit Variables for making AI/ML driven decisions.
- Added new features to a **Node.js** application used to generate reports that provide valuable insights and vital information on more than **11,000,000 business entities** of all ages and sizes.
- Improved performance of application by utilization of lazy loading technique and redux dispatch optimization. **Improved initial load speed from 16s to 5s.**
- Added OTP verification as an additional layer of security for the existing authentication system of the application using **AWS Amplify**.
- Implemented analytics events using **Mixpanel** to track the user behaviour and to gather insights for further Product Improvement.
- Mentoring new interns, junior developers, reviewing their code and helping them understand the best practices to be followed for better code quality.

Senior Software Engineer

Capgemini**09/2019 – 02/2022**

- Created new UI features, functionality, and capabilities for Banking applications using **React**, styled-components, and **TypeScript**.
- Implemented stable reusable React components which are responsive cross-browser compatible, secure, performant, production ready, and optimized to the Web to the **shared UI component library** to be used by future applications.
- Worked in building **Micro-Frontends** which are used by several applications.
- Worked in **Agile Methodologies** for incremental development and ensured timely delivery of the product.
- Participated in **Code Reviews** and ensured the code is working as expected and as per requirement and made sure it is the most optimized code and code practices are followed.
- Implemented **Unit Testing** using Jest for React projects along with Enzyme test utilities and making sure the code coverage is met.
- Maintained states in the stores and dispatched actions using **Redux**.
- Extensively used **Git** for version controlling and regularly pushed the code to **Bitbucket**.

SKILLS AND TECHNOLOGIES

- **Languages:** JavaScript, Java, TypeScript, HTML5, CSS3.
- **Frameworks, Tools & Skills:** React.js, Redux, Bootstrap, Git VCS, Styled Components, Webpack, JSX, Virtual DOM, Firebase, REST API, Sonar, DOM manipulation, Jenkins(Continuous Integration/Continuous Deployment), Nexus, Babel, Web API's, JSON, NPM.
