WORK EXPERIENCE

Associate Consultant   **Capgemini**   **09/2019 – Present**

- Created new features, functionality, and capabilities on Banking applications using React, styled-components, and TypeScript.
- Implemented stable reusable React components which are responsive cross-browser compatible, and optimized to the Web to the shared component library to be used by future applications.
- Worked in building Micro-Frontends which are used by several applications.
- Worked in Agile Methodologies for incremental development to deliver a better application.
- Participated in Code Reviews and ensured the code is working as expected and as per requirement and made sure it is the most optimized code and code practices are followed.
- Using Jenkins to maintain CI/CD (For deployment) in the SDLC.
- Implemented Snapshot testing using Jest for React projects along with Enzyme test utilities and making sure the code coverage is met.
- Maintained states in the stores and dispatched actions using Redux.
- Extensively used Git for version controlling and regularly pushed the code to Bitbucket.

PERSONAL PROJECTS

COVID-19 Tracker: Built a Covid-19 Tracker web application that gives the live details of the coronavirus cases using React.js, Leaflet for maps. This application fetches the details from disease.sh API for details of the cases.
Hosted application Link: https://covid-19-tracker-76b59.web.app/

Amazon Clone: Built a clone of Amazon using React.js. The state management was done by using React Context API. This application was then deployed on Firebase.
Hosted application Link: https://clone-7d06d.web.app/

Messaging Application: Built a messaging web application using React.js in which users can send group messages and the messages are updated in real-time in the Database. The database used was Fire Store. Styling was done using Material UI.

Netflix Clone: Built a clone of the Netflix Website using React.js. Used the TMDB API to fetch movie details. Added Authentication by using Firebase.
Hosted application Link: https://netflix-clone-a0097.web.app

SKILLS AND TECHNOLOGIES

- **Languages:** JavaScript, Java, TypeScript, HTML, CSS.
- **Frameworks and Tools**: React, Redux, Git VCS, Styled Components, Webpack, Firebase, RESTful API, NPM, Spring Boot.

EDUCATION

Bachelor in Engineering - Bangalore Institute of Technology - VTU   **2015 – 2019**
CGPA: 8.6 - First Class with Distinction

High School – Jain College   Percentage - 92%   **2015**
